-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

Claim 13 is objected to because of the following informalities: In claim 13, lines 15 and 16, "the primary stream produced" should be –the primary stream is produced— and "stream to shale shaker" should be –stream to a shale shaker--. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 13 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Southall (RE 38,367).

Southall discloses a method of drilling with a drilling fluid containing beads. The drilling fluid is circulated in the annulus. A primary stream is pumped into the drilling fluid. The primary stream contains drilling fluid and beads. The beads reduce the density of the drilling fluid. The primary stream is produced by feeding the first stream to a hydrocyclone that is part of a shale shaker. The primary stream is produced as overflow and contains the drilling fluid and beads. As to claim 17, the hydrocyclone produces a first stream containing beads and a second stream absent of beads. The

stream containing the beads is continuously fed to the drilling system to reduce density of the system.

***Allowable Subject Matter***

Claims 14-16 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-12 and 19-24 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P Neuder whose telephone number is 703-308-2150. The examiner can normally be reached on Tuesday through Friday.
